The FCC should reject NAB's petition 04-160. I absolutely do not agree with this petition. As XM radio subscriber, I depend on the traffic and weather service for my small business.

It is blatantly obvious that this is just a ploy by FM and AM radio broadcast companies to eliminate satellite radio competition from the market. If they don't like the fact that satellite has become so popular, then offer some competition, give me a reason to listen to standard radio. They don't want to do that, they don't want to work to remain competitive in the marketplace. They want to cry to mommy and daddy when they don't get their way.

I want this service, I pay for this service, LEAVE IT ALONE.
